Data Cleaning & Preparation

Change Log – Artifact of Record

Batch 2026 | Intern Program | Powered by DecodeLabs

Intern Name: Maroof Ali

Total Changes	Records Preserved	Duplicate IDs	Date Format Errors
CR001 — CR006 6	Missing value imputation 309	Error rate — Verified 0%	Error rate — Verified 0%

Change Records

Change ID	Column Affected	Issue Found	Action Taken	Impact	Status
CR001	CouponCode	309 null values (25.75% of records)	Imputed with 'No Coupon' — orders without a coupon code	Preserved 309 records; no data loss	Resolved
CR002	OrderID	Checked for duplicate records	Verified 0 duplicates; drop_duplicates(subset=['OrderID']) applied	Integrity confirmed; 1200 unique orders	Resolved
CR003	Date	Column required datetime format	Converted to <code>datetime64[ns]</code> using <code>pd.to_datetime()</code>	Enables time-series analysis; 0% format error rate	Resolved
CR004	UnitPrice	Floating point precision not standardised	Rounded to 2 decimal places using <code>.round(2)</code>	Consistent numeric precision across price columns	Resolved
CR005	TotalPrice	Floating point precision not standardised	Rounded to 2 decimal places using <code>.round(2)</code>	Consistent numeric precision across price columns	Resolved

CR006	Product, Payment Method, OrderStatus, ReferralSource, ShippingAddress	Potential whitespace and inconsistent casing in text columns	Applied .str.strip().str.title() to all text columns	Standardised text format; prevents groupby/merge errors	Resolved
-------	---	--	--	---	----------

Final Status: All 6 change requests resolved. Dataset meets DecodeLabs Project 1 quality standard. Dataset dimensions after cleaning:

1200 rows × 14 columns

Missing values: **0**

Duplicate IDs: **0**
